

THE NEW STANDARD IN TRAILER BRAKING

AL-KO vehicle technology has produced the first hydraulic disc caliper with true performance rating.

Available in Dacromet or Marine grade stainless steel, and with a stopping capacity of 1600kg, the AL-KO hydraulic brake calipers are available for 13" to 16" rims.

Hard wearing, resilient and built tough for Australian conditions, when it comes down to it, your life could depend on making the right selection. That is why AL-KO hydraulic brake calipers should always be your number one choice in trailer braking systems.
