

The AL-KO Big Foot™

The **AL-KO Big Foot™**, protected by registered design, is a corner steady accessory designed to add extra stability to caravans on any surface. In fact, it exceeds the Recreational Vehicle Manufacturers Association of Australia recommended corner steady support capacity.

The **AL-KO Big Foot™** is able to be fitted as an aftermarket product to most caravans or camper trailers on the Australian market and remains a permanent attachment to the corner steady.

This unique product provides the existing corner steady with a flat load bearing surface, which is ideal when parking the caravan on soft ground. This means that there is no longer a need to carry around pieces of wood to put under the corner steady. In addition, the **AL-KO Big Foot™** is cleverly designed to ensure that it stays still even when the caravan moves, protecting it from damage due to abrasion.

With the **AL-KO Big Foot™** attached to the corner steady, the problems associated with steadying your caravan on soft ground will be a thing of the past.

Further information can be obtained by contacting AL-KO on 1800 035 603 or by visiting:
