

**PRESS RELEASE**

**October 2006**

**A BRAND NEW SPACE SAVING SKYLIGHT WITH MAXIMUM FEATURES**

AL-KO is delighted to advise that the new **REMItop vario Multifunctional Skylight** has just been launched onto the Australian market.

The most impressive feature of the new **REMItop vario** is the wind up roof hood which reduces the amount of space required on the roof of the caravan. This allows additional space for other appliances including air conditioning systems and aerials.

Safety and convenience were at the forefront of the designers' minds. No longer will you have to endure the unsafe act of climbing up onto a chair to push open the skylight. Just simply reach up and push the fold-away handle and out it pops from the panel, allowing you to effortlessly wind the skylight into your preferred position.

The **REMItop vario** is available in 400 x 400mm; 700 x 500mm; and 600 x 900mm sizes. Most importantly this range of skylights provides excellent fixed ventilation, with all sizes exceeding the Australian Standards requirements.

The roof hood can be opened out by up to 60° for maximum airflow and the unit is manufactured with double acrylic, dark tinted panels providing excellent insulation properties.

The tried and tested integrated blind system is included in this feature packed skylight. The blind system is manufactured from a darkening pleated material and is continuously adjustable. While the close-meshed flyscreen prevents any unwanted visitors making it inside and ensures you can comfortably sleep with the skylight open.

The **REMItop vario** is one of the most competitively priced skylights available on the Australian market. This combined with the excellent features will see many more caravans and motor-homes fitted with the **REMItop vario** skylight.
