

The new REMIfrontIII Blind

AL-KO international, the exclusive distributor of Remis products in Australia and the market leader in vehicle components are proud to introduce the new improved REMIfrontIII blind.

This block out system, designed for windscreens and driver and passenger side windows, will provide both privacy for users and protection from the harsh Australian sun.

The new REMIfrontIII blind from AL-KO will allow users to sleep well or drive without sight restriction, ensuring the holidaying experience is enjoyed by all. The upper trim improves the degree of darkening. The inside mirror no longer has to be removed. A new tube guide system simplifies operation and is gentle on the material.

Some of the benefits of the REMIfrontIII Blind include:

- High degree of darkening for the entire driver's cab
- Personal privacy
- The multilayered structure of blind materials reduces temperature change inside the cab
- Fast simple installation in new and existing vehicles
- Detachable so when you change vehicles, so does the blind
- Easily slid into place and locked away ensuring driving vision is not affected.

Further information can be obtained by contacting AL-KO on 1800 035 603 or by visiting:
