AL-KO Tube Axles

The strong lightweight axle solution

Up To 40% Weight Reduction
compared to solid beam
AL-KO Tube Axles – The strong lightweight axle solution

AL-KO Tube Axles offer significant weight saving compared to a solid beam. Due to their stiffness & design, capacity doesn’t reduce proportionally to weight.

This makes AL-KO Tube Axles attractive to manufacturers who want to reduce weight of their trailer or caravan but still maintain the same carrying capacity.

The range of AL-KO Tube Axles are made in Australia from premium materials specifically to suit Australian conditions. All axles and drums are zinc plated eliminating paint issues.
